

Appendix table B-2: Silhouette width summary by cluster.

Cluster	N	Average silhouette width	Negative silhouette widths, n (%)	Minimum silhouette width
Cluster 1	459	0.23	< 3 (< 1%)	0.00
Cluster 2	491	0.15	67 (13.6%)	-0.09
Cluster 3	431	0.25	5 (1.2%)	-0.02

Negative silhouette widths indicate that some observations may be better assigned to a neighbouring cluster.
Cells with fewer than 3 observations are suppressed to protect confidentiality.
